DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 8-14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 8, line 10, the recitation of “a substrate” is unclear whether it is the same substrate as claimed in line 2 or not.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 4, 8, 11, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheng et al. (US 5,345,366).

Cheng et al. disclose an electrical structure, comprising:

first contact pads (11, 17, see Figure 2) on a first substrate (12); and

second contact pads (9) on a second substrate; and

a plurality of first and second conductive wires (24, 39);

the contact pads are adapted for solder bumps;

Allowable Subject Matter

5. Claims 2-7, 9-14 and 16-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claims 2-3, 9-10, and 16, the prior art of record fails to teach the conductive wires are positioned between the radial edges of sectors.

Regarding claims 5, 12 and 18, the prior art of record fails to teach the substrate consisting a group of single wiring layer.

Regarding claims 6-7, 13-14 and 19-20, the prior art of record fails to teach the substrate comprises layers.
